### Legal Responses to Climate Change

Dr Nicola Durrant  
$55.00

The challenges of climate change pose problems requiring new and innovative legal responses by legal practitioners, government officials and corporate officers. This book addresses a broad range of topic areas where climate change has impact and systematically analyses the key legal responses to climate change, both at the international level and within Australia at federal, State and local levels. In particular, it critically examines:

- the rights, duties and market mechanisms established under the international climate change regime
- the effect of climate change policies on the implementation of environmental and planning laws
- new regimes for the implementation of renewable energy and energy efficiency initiatives
- legal frameworks for the implementation of biological and geological sequestration projects (including forest projects and carbon rights); and legal principles for the design of an effective carbon trading scheme for Australia
- It also considers the role of the common law including:
  - the likely response of the law of torts to emerging forms of climate change harm; and
  - potential liabilities for professionals who must take climate change into account in their decision-making and advice

### Freight Charges

**Australia Post:**
- Queensland only  
  - $8.50
- Remaining Australia  
  - $13.00

**Courier:**  
- (Parcel must be signed for)
  - Postcodes 4000 – 4199  
    - $8.50
  - Postcodes 4200 – 4599  
    - $13.00
  - Postcodes other  
    - within Australia
  - $15.00

**Express Post:**
- Up to 500g  
  - $9.00
- Up to $130  
  - $13.00
- Over $130  
  - $20.00

**Add Freight**

To find the total freight charge, use the following:
- Direct charge:  
  - $8.50
- Postcodes 4000 – 4199  
  - $8.50
- Postcodes 4200 – 4599  
  - $13.00
- Postcodes other  
  - within Australia

Legal Responses to Climate Change
By Dr Nicola Durrant

The challenges of climate change pose problems requiring new and innovative legal responses by legal practitioners, government officials and corporate officers. This book addresses a broad range of topic areas where climate change has impact and systematically analyses the key legal responses to climate change, both at the international level and within Australia at federal, State and local levels. In particular, it critically examines:

- the rights, duties and market mechanisms established under the international climate change regime
- the effect of climate change policies on the implementation of environmental and planning laws
- new regimes for the implementation of renewable energy and energy efficiency initiatives
- legal frameworks for the implementation of biological and geological sequestration projects (including forest projects and carbon rights); and
- legal principles for the design of an effective carbon trading scheme for Australia.

It also considers the role of the common law including:

- the likely response of the law of torts to emerging forms of climate change harm;
- and potential liabilities for professionals who must take climate change into account in their decision-making and advice.

CONTENTS
The Role of Law in Responding to Climate Change
Part I - Setting the Foundations
- Science and Economics of Climate Change
- Comparative Models of Atmospheric Regulation

Part II - The International Response to Climate Change
- Architecture of the UNFCCC and Kyoto Protocol
- The Kyoto Flexibility Mechanisms
- Monitoring and Enforcement of the International Climate Change Regime
- Future Directions Post-Copenhagen

Part III - Australia’s Legislative Response to Climate Change
- The Traditional Approach to Emissions Reductions
- Creating an Effective Emissions Trading Scheme
- Renewable Energy and Tradeable Certificates
- Energy Efficiency in the Property Sector

Part IV - Sequestration and Offset Projects in Australia
- Legal Issues in Biological Sequestration Rights and Liabilities in Carbon Capture and Storage

Part V - Environmental Law and Climate Change Harm
- The Role of Environmental Law in Minimising Harm
- State-Based Assessment of Greenhouse Gas Emissions Assessment and Approval under Federal Environmental Law
- Facilitating Adaptation to the Impacts of Climate Change

Part VI - Common Law of Torts and Professional Liability
- The Hypothetical Climate Suit in Negligence
- Climate Change and Causation Issues
- Liabilities of Local Authorities in Adapting to Climate Change
- Prospects of Success and Insurance
- Professional Liability and Climate Change
